### **DETAILED ACTION**

1. The Response by the applicant has been considered. The examiner is still having a problem with pinpointing exactly what the interrupt signal is doing in comparison with the way other interrupts are used. In order to try to resolve these issues the examiner is requiring the applicant to submit a drawing of a flow chart illustrating several steps of a spin coating process and showing how the interrupt signal and timers function. This does not have to be a formal drawing by a draftsman. After the drawing(s) is received the examiner will notify the applicant's attorney to schedule a telephone interview to see if the issues in this can be resolved.

The applicant is given **30 days or one month** from the date of mailing of this Action to submit the drawing(s).
